

Digital SLR Housing System Hire Seacam Housing and Nikon D200

The Seacam D200 housing for the popular Nikon D200 digital SLR camera puts professional digital photography at your fingertips for vivid and spot on exposures.

Seacam's innovative design of the housing puts a tough aluminium body that is filled with features to make your underwater photography a pleasure.

Combining newly developed Nikon technologies with advanced features, the D200 is a precision-engineered, high-performance digital SLR designed to satisfy the requirements of passionate and demanding photographers.

Employing a newly developed 10.2 megapixel sensor, and featuring Nikon's exclusive image processing engine, the D200 captures images with sharp detail and faithful colour to deliver extraordinary resolution.
